ISIS - Bug #1952

cam2map projects images of one target to a different target

2014-01-03 07:17 AM - Stuart Sides

Status:	Closed		
Priority:	Normal		
Assignee:	Curtis Rose		
Category:	Applications		
Target version:	3.4.13 (FY16 R3 2016-08-31 Aug)		
Impact:	Users will not be able to use a TargetName in the map file that does not match the TargetName in the instrument group of the input cube.	**Software Version:**	

Description

cam2map will project an image with an instrument group target name of one target (e.g., Jupiter), to different mapping group target (e.g., Io).

Command Line:
cam2map FROM=Jupiter.cub TO=out.cub map=Io_map.cub match=true

Jupiter.cub - has an instrument group with TargetName = Jupiter
Io_map.cub - is a mosaic of Io, thus has a mapping group with TargetName=Io
